

Zachary Blauser

Tampa, FL • +1 727 514 8912 • github.com/zblauser • zacharymblauser@gmail.com

PROFESSIONAL SUMMARY

Software developer specializing in systems programming, infrastructure automation, and developer tooling. Proficient in C and Python with hands-on experience in enterprise telecommunications and large-scale network operations. Currently completing accelerated B.S./M.S. in Computer Science while building production tools used in commercial deployment workflows. Proven ability to design, build, and ship software that solves real operational problems.

TECHNICAL SKILLS

Languages: C, Python, JavaScript, Bash, SQL, HTML/CSS

Operating Systems: Linux (Arch, Alpine, Debian, Ubuntu), macOS, Windows

Systems & Infrastructure: Git, Docker, Network Infrastructure, TUI Development

Tools & Frameworks: Flask, Tkinter, FFmpeg, Make, Regex, SAP ERP

Specializations: Systems Programming, Infrastructure Automation, CLI Tooling, DevOps Workflows

PROFESSIONAL EXPERIENCE

Spectrum (Charter Communications) — Network Field Support Representative III Tampa, FL
Feb 2025 — Present

- Enterprise-level routing and deployment for high-value commercial accounts across multi-state service regions.
- Coordinate project managers, field leaders, and engineering teams in resolving installation and infrastructure issues.
- Assist in troubleshooting network configurations and dispatch logistics for large-scale fiber and coax technicians.
- Develop internal automation tools to streamline daily workflow and improve large point job efficiency.

Polaris Connectors (NSI) — Lead Production Operator New Port Richey, FL
Sep 2023 — Jun 2024

- Led production line operations, while holding a 99.9% in quality and assurance.
- Tested CNC and finished components to flag inventory anomalies and expedite part sequencing.
- Collaborated with engineering to reduce downtime in fabrication process.

Pall Aeropower (Danaher) — Production/Assembly New Port Richey, FL
Oct 2021 — Jul 2023

- Utilized SAP inventory management system to track aerospace components at various stages of the assembly process.
- Partnered with warehouse engineers to improve the raw mesh and media materials in aerospace components.
- Fabricated oil/air filters from cut material and CNC parts, at all stages of the process.
- Supported production goals, i.e. project for the "Airbus XLR," by improving raw material logistics and traceability.

EDUCATION

Western Governors University — Salt Lake City, Utah

B.S. in Computer Science — Graduating May 2026

Progressing directly to M.S. in Computer Science upon completion.

Relevant coursework: Data Structures & Algorithms, Software Engineering, Computer Architecture, Network System Design, Web Development, AI/ML Foundations, Operating Systems, Database Management.

University of South Florida — St. Petersburg, FL

B.A. in Political Science — Graduated May 2025

Relevant coursework: Statistics & Probability, R Programming.

PROJECTS

Hako — Modal Text Editor (C)

v0.0.7 — github.com/zblauser/hako

Lightweight terminal-based text editor with vim-inspired modal editing, syntax highlighting, split-screen navigation, an internal explorer, and configured via `.hakorc`. Built for performance and portability across Unix-like systems. Active development includes planned LLM integration for in-editor AI, using a model of choice, including local models.

LoMux — FFmpeg GUI Front-End (Python/Tkinter)

v1.0.0 — github.com/zblauser/LoMux

User-friendly interface for FFmpeg that simplifies batch encoding, codec flag management, and format presets.
